Carpet Care + Maintenance Guide

Thank you for choosing Capozza Floor Covering Center for your carpet flooring project. To help ensure the look and longevity of your new carpet, we have compiled the following recommendations for its proper care. **Manufacturer's instructions will supersede the below information should the instructions differ.**

- Vacuum frequently to remove debris and avoid matting.
- Consider the use of walk off mats at exterior doors to help prevent transfer of outside elements onto your new carpet.
- Clean spills promptly to prevent stains from setting in. Talk to your sales representative about manufacturer recommended products for your specific carpet. Cleaners are available in our showroom.
- Clean carpets by hot water extraction or steam cleaning every 12 - 18 months or more depending on traffic to remove oils and deep particulates. A professional cleaner that is CRI Seal of Approval certified will use high quality cleaners and or practices to best care for your carpet and may be required by the manufacturer to maintain warranty.

If you have any other questions about the care of carpet, please give our team a call at 207-797-7635.

Thank you for choosing Capozza Floor Covering Center and enjoy your new carpet for years to come!
