Vinyl Care + Maintenance Guide

Thank you for choosing Capozza Floor Covering Center for your vinyl flooring project. To help ensure the look and longevity of your new vinyl, we have compiled the following recommendations for its proper care. **Manufacturer's instructions will supersede the below information should the instructions differ.**

Luxury vinyl is a low maintenance option, hence there is little that needs to be done:

- Sweep your new vinyl flooring frequently to remove debris
- Wipe up spills promptly with a dry white cloth and damp mop vinyl floors regularly.
- Consider the use of walk off mats at exterior doors to help prevent scratching as well as transfer of outside elements onto your new vinyl flooring.
- For all over cleaning talk to your sales representative about manufacturer recommended products for your specific flooring. These daily cleaners are available in our showroom.

If you have any other questions about the care of vinyl, please give our team a call at 207-797-7635.

Thank you for choosing Capozza Floor Covering Center and enjoy your new vinyl flooring for years to come!
